

HURRICAIN ONE®

Single-Use 4% Lidocaine Spray

Efficiency and Infection Control in ONE Simple Solution.

HurriCaine ONE® 4% Lidocaine is the first and only unit-dose, non-aerosol topical anesthetic spray for temporary pain relief during minor procedures and injections. Each single-use applicator delivers a controlled dose to reduce cross-contamination and medication waste. Formulated with lidocaine, BZK, and alcohol, it provides fast, long-lasting relief. Barcode tracking supports BCMA protocols for documentation and point-of-care use. **So, it's the one smart choice for safe, efficient, and hygienic pain relief.**

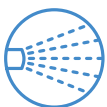

Infection Control

Single-use packaging
reduces cross-contamination

Optimal Performance

Onset within 5 minutes
Duration of 10+ minutes

360° Area Spray

Completely covers
application area with
minimal waste

Barcode Tracking

Allows for charge
capture and patient
documentation

Controlled Dose

Reduces the risk of over-
application for improved
medication safety

Antimicrobial

Provides germ-killing,
bacteria-reducing
first aid

Cost-Effective Relief

Avoids the cost of
wasted product and
discarded leftovers

The ONE choice to improving care.

Wide Range of Uses

- Prior to injections and temporary relief for minor cuts, scrapes, and burns
- For minor external procedures such as dialysis, vaccinations, and venipuncture

Improved Safety

- CHG compatible
- No introduction of additional bioburden
- FDA-compliant for antiseptic performance

Efficiency and Performance

- Ready to administer and simple to use
- Onset within 5 minutes
- Duration of 10+ minutes

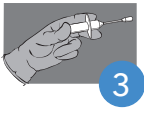

How to Use

1 Tear at notch to open pouch. Remove HurriCaine ONE from pouch.

2 To unlock, turn clockwise.

3 Grasp HurriCaine ONE firmly by placing your index and middle fingers on the finger grip and position your thumb against the base of the plunger.

4 Apply firm pressure to the plunger by pushing your thumb forward to initiate the spray action.
